HAILEMICHAEL ATRSAW

ADDIS ABABA, ETHIOPIA | +251-912-828-397/+251-928-561-071 | career.hailat@gmail.com

About

I am a capable, creative, team-oriented, engaged and starter individual, with a dynamic outlook on life and a strong desire to succeed. In addition, I am adept at handling multiple tasks on a daily basis competently and at working well under pressure. Strong communication skill is also one of my soft skills that I acquire while performing several team projects.

- Develop software products
- Learn the concept of professionalism

GAMD Solution – Consulting Company

Junior Software Developer / Jan 1, 2022 – May 16, 2022

The key responsibilities I was assigned to are:

- develop, deploy and maintain software
- prepare BID document for BID inquiry companies

KIN IDEAS PLC.

Senior Full Stack Developer / May 16, 2022 – Now

The key responsibilities I was assigned to are:

- develop and maintain software
- deploy systems to AZURE and GCP
- maintain cloud issues
- prepare Architectural document

Projects

TIN Checker

GAMD Solutions / Web App / https://tinchecker.gamdsolutions.com/

Flask and XML API are used. The system checks for TIN number if it exists in the database. It is currently in use by government institutes and government officials.

Landing Page

KIN IDEAS PLC. / Web App / https://www.kinideas.com/

Landing page for the KIN IDEAS PLC. HTML, CSS, jQuery are used.

KIN Music App

KIN IDEAS PLC. / Mobile App / https://www.kinideas.com/

Mobile application used for music, podcast and radio streaming. I am responsible for the backend services. Django framework is used to develop the system alongside with REST API. DRF (Django rest framework) is used as client for the REST service build on top Django project.

KIN Music Admin Portal

KIN IDEAS PLC. / Web App / https://www.kinideas.com/

Web application used for administering the streaming service. It handles all CRUD operations alongside with PostgreSQL as database. It uses DRF endpoints to make operations. React framework is used to develop the system alongside with Redux state management tool.

Awards and Acknowledgements

Certificate of Acknowledgement

National Bank of Ethiopia / June 2, 2021

Certificate of acknowledgement for completing the four-month internship program at National Bank of Ethiopia in the Information System Management Directorate. And, for developing a visible project which registers all car license plate numbers that are allowed to enter the parking area of the bank. The system automatically detects the license plate of approaching car, compare the license plate number and confirm if allowed to enter or not.

Conclusion

I thank you for your time and consideration in examining my qualifications for this position. I very much look forward to continuing to the next stage of the hiring process with you. From there, I hope to start a fulfilling and productive career in which I will be able to learn from others on your team and become a part of the family.
